OVERVIEW

We are one of the leading environmental law firms in Indiana and have focused in this area since the firm opened. Our attorneys have decades of experience in front of both federal and state regulatory agencies, and our clients benefit from our knowledge of the complex history behind virtually any environmental law. Our team includes engineers, biologists, and environmental science majors. Our technical and scientific backgrounds allow us to fully understand clients' special needs and to creatively solve your environmental legal problems. We understand your business needs, allowing us to partner with you to achieve your optimum solutions.

We work with clients on a broad variety of regulation and permitting under the Clean Air Act, the Clean Water Act, and the Resource Conservation & Recovery Act (RCRA), as well as the corresponding state programs implementing these federal acts. We assist clients with cleanups and responses performed under both state and federal programs. We have experience working with local governmental authorities for your environmental issues, and we can assist with due diligence and compliance issues around the country. Finally, we can help you structure your transactions to limit or control your environmental liabilities.
